

Louvain-la-Neuve, January 8th, 2018

**PRESS RELEASE**

Minh Hua was appointed Chief Information Officer of Minafin Group on January 8<sup>th</sup> 2018. Minh's responsibility consists in defining and developing across all business units the information system (IS) strategy required to achieve the growth objectives of the Group and secondly leading the necessary changes to improve the flow of relevant information inside and outside the Group with the view to continuously raise the quality of services expected by our customers, without compromising the security and the integrity of Minafin's data and systems.

Minh has a strong international expertise in IS/IT globalization and standardization strategies. She graduated as a Civil Engineer with an MSc. in Mechanics & Physics from the University of Liège. She held several IT management positions at EFT and Unilever before joining GSK Biologicals as IT R&D Director (2005-2011). Minh then moved to Magotteaux, a Belgian company active in more than 20 countries where she held the position of CIO in charge of the management of a team of 60 people.

Minh reports to Frédéric Marmousez, the Group's Managing Director and is based at the Minafin headquarters in Louvain-la-Neuve.

About Minafin group:

*Minafin is a global fine chemical developer and manufacturer with current sales of EUR 160 million, 5 R&D centers and 6 factories in Belgium, France, Germany and the USA, and almost 800 employees worldwide. It is present across the various market segments with 5 brands: Minakem for developing and manufacturing pharmaceutical chemicals and APIs, Minasolve for developing and manufacturing cosmetic ingredients, Pennakem for green chemistry, Minascent for challenging chemistry and Pressure Chemical for high pressure chemistry and niche polymers.*
